SUBJECT: Organization of the Technical Committee 'Precision Instruments for Ships' Equipment and Maritime Lights.'

Because of the as yet unsatisfactory cooperation between the industry and ultimate consumers of precision instruments for ships' equipment and maritime lights, the Main Administration for Shipbuilding, Precision Instruments, and Optical Equipment in the Ministry for Machine Construction of the GDR has ordered on 21 March 1951 that the above mentioned Technical Committee be organized.

The VVB Mechanik has been placed in charge of this Technical Committee. Following an earlier directive issued by the Minister for Industry on 10 September 1950, and upon the suggestion of both Main Administrations, the head of the Department of Research and Development of the VVB Mechanik, Engineer Gustav Thomas, has been appointed to head this Technical Committee. You are hereby requested to send one or two colleagues to the organizational meeting to be held on Thursday, 12 April 1951, at 10 a.m. in the Haus der Ministerien, Berlin W 1, Leipzigerstr. 5-7, room 3200. These men should be completely or approximately familiar with the field of work of such a technical committee.

The Technical Committee is composed of five technical sub-committees, to cover the following fields:

- Research and Development
- Production Program and Production Capacity
